WHOLESALE PRICE LIST SPRING of 1918

For
Nurserymen
Only

California Nursery Co.

NILES, CALIFORNIA

W. V. EBERLY
Manager

Announcement

These nurseries have been established and in active operation at Niles, California, since 1884. They are located on a tract of land comprising 465 acres, the soil being regarded as the cream of Alameda County. Time has established the fact that the late John Rock, who was the guiding spirit of this enterprise from the year of its inception until his death in 1904—having come here from Wayne, Santa Clara County, where he had been conducting the largest nursery in the State for a period of twenty years—acted wisely in selecting this favored spot. That nurserymen and business men like R. D. Fox, Thomas Meherin, James Hutchinson and William J. Landers should have become associated with Mr. Rock in this great enterprise, was a sufficient indication of their confidence in the future of this place for the development of a great and thriving nursery business. That this selection was a wise one has been fully demonstrated, for it is very rare indeed that it is possible for a nursery business to continue in one place for thirty-five years and succeed in growing successfully such an assortment of fruit and ornamental stocks—probably the largest and most complete in the United States.

Having a large and magnificent stock of ornamentals with soil of the very best character for balling, it has been considered advisable to broaden the scope of the business and not only seek to extend the already large business throughout the Pacific Coast States but to the Middle West and Eastern States as well. With this idea in view we are soliciting business. It goes without saying that our many years' experience places us in a position to thoroughly understand the preparation of stock and the packing of same, so that with ordinary care in transit, no matter what the distance may be, it should reach destination in good order.

In conclusion, we wish to say with our intimate knowledge of the nursery conditions throughout the state, that should there be anything wanted which we do not list it will be a pleasure for us to endeavor to find the stock and make a prompt response as to its availability and quote prices.

On all stock not quoted in this list we will allow the trade a discount of not less than twenty per cent from our regular price list which will be mailed on application; and in some instances more than this, depending on our supply of the particular stock for which inquiry is made.

CALIFORNIA NURSERY COMPANY.
W. V. EBERLY,
Manager.

Terms and Conditions

SHIPPING SEASON: Deciduous shade trees from November 1st to March 31st.

Evergreens from September 1st to May 31st.

Fruit Trees from December 1st to April 15th.

Roses from November 1st to April 30th.

Specimen trees may be forwarded at any season of the year provided we are given a few months' notice in advance to prepare such trees for shipment. However, we always have a large assortment of established stock on hand.

SHIPMENTS: Always state how you want us to ship—by freight or express; also designate the route. In the absence of instructions we will use our very best judgment but in no case will we assume any responsibility for safe or prompt delivery or any injury caused by delay on the part of the transportation companies.

TERMS: Firms unknown to us will either have to pay cash or give security, or furnish us with satisfactory references. Orders to be sent C. O. D. should be accompanied with one-fourth cash.

PRICES: Quotations in this catalog are net. No discount.

CAUTION: All orders are accepted with the express condition that they shall be void should any injury befall the stock ordered from any cause over which we have no control.

CLAIMS: All claims must be made within ten days after receipt of the goods, otherwise they will not be allowed.

PACKING: Prices in this list do not cover packing charges. Our charges are reasonable, however, and are made with a view to covering the cost of material only. No charges are made for delivery to the freight or express office.

REFERENCES: As to our standing and responsibility we refer to the Central National Bank of Oakland and the Mercantile National Bank of San Francisco.

SPECIAL NOTICE: We invite the closest inspection of our stock and our nurseries. Our office and grounds are on the State Highway less than a mile west of Niles. If coming by train take the Southern Pacific to Niles and telephone us from the station or notify us beforehand of the time of arrival and we will meet train with a conveyance.

TELEGRAPH and TELEPHONE: All telegrams should be addressed to the California Nursery Company, Niles, California. In telephoning call for California Nursery Company, Niles.

GUARANTEE: The California Nursery Company will exercise care to have all stock true to name, nevertheless it is understood and agreed that should any stock prove untrue to name, the California Nursery Company shall be liable only for the sum paid for the stock which may prove untrue, and shall not be liable for any greater amount.

All communications should be addressed to

CALIFORNIA NURSERY COMPANY,
NILES, CALIFORNIA.

A section of a block of *Abies* and *Picea*. Note how symmetrical they are.

Specimen Stock Conifers

All the plants listed under the heading SPECIMENS are very carefully selected. Our many years' experience in handling evergreens warrants us in saying to those who may favor us with their orders that we will send only stock that is sure to give satisfaction.

For an attractive decorative palm, combining hardiness with its many other good qualities, there is nothing which will compare with *Chamaerops humilis*.

Just to show you the size of the palms supplied by us to the Panama-Pacific International Exposition in 1915.

Hardiness of Palms

A short time ago a prominent newspaper editor of Atlanta, Georgia wrote us that *Trachycarpus excelsa* palms furnished him had stood a temperature of 4° below zero without injury.

A specimen *Phormium cookianum variegatum* (Golden New Zealand Flax). A 5 ft. plant in a 16 x 16 inch box.

Our roses have been cut by a digger pulled by gasoline motor. This team follows up with a heavy road plow designed for the purpose and plows the roses out. The roots are perfect.

The bulk of our roses are budded on Manetti. We also use Gloire des Rosomanes and La Grifferaie. We grow several varieties of Hybrid Perpetuals, Banksia and Cherokee on their own roots. Last year and this season we shipped several carloads to nurserymen in the far eastern states and they had only words of praise for the plants which we forwarded to them. We are prepared to enter into contracts to grow roses in large blocks in either standard or tree roses and bush plants. Our plants attain their full size in June, permitting us to harden them off (with our exceptionally cool summer climate) and have them ready for shipment in November or even earlier if necessary. We have visited the leading Rose Nurseries of Europe, and can say with every degree of confidence that our stocks for vigor and size are in a class by themselves and are in every

It is not surprising that our Superintendent should be proud of his handiwork in growing rose stocks like the sample he is holding in his hand.

sense of the word superior to any foreign grown plants. All of our wild stocks are disbudded thus eliminating all the annoyance from suckers.

Give us a trial order.

Roses We have over four hundred varieties and will be glad to bud any desired kind if ordered in July and make delivery eighteen months later.

This is the source of our water supply. Our manager would not be sitting so contentedly over the 36-inch intake pipe supplying the nursery with water at any other season of the year than the late Fall. In the winter months this creek is a turbulent torrent.

Exterior of lath house used as a cover for our specimen evergreen trees and shrubs. The plants in boxes are spruces and New Zealand Flax. The climber at the extreme end is *Muehlenbeckia* and the tall trees immediately adjoining are Monterey Cypress. These afford protection to thousands of boxed palms.

Fruit Trees and Small Fruits

We have the largest assortment of varieties on one place in the United States, including Apples, Pears, Cherries, Plums, Peaches, Nuts of different kinds, small fruits, grapes and many novelties. To illustrate the immensity of our stock, a few years ago we furnished the U. S. Department of Agriculture with two hundred and fifty varieties of foreign Grapes. Next summer we expect to send out a list of varieties of fruit that we have and can furnish bud wood of.

At this time will be glad to figure with the trade on any list of fruit trees, small fruits or vines they may be interested in, and shall be glad to mail on request our current retail price list showing varieties and discounts to Nurserymen.

Myrobolan Plum Seedlings

We are now digging and grading our large stock and believe we will have about one hundred thousand in surplus made up of the following sizes: 5 to 7 m/m, 3 to 5 m/m and 2 to 3 m/m. If interested write or wire immediately as there is a large demand. The stock could not possibly be of better quality.

It takes a great many years to grow a block of *Trachycarpus excelsa* (Windmill palm) like this. Their remarkable hardness, adaptability for avenues, grouping and for porch decoration should make them exceedingly popular in Oregon, Washington, Nevada, Arizona, New Mexico and the Southern States where they are not generally known.

**Washingtonia
gracilis.**

One of the most popular of California palms. This palm would weigh, when boxed in a 30 x 30-in. box, packed ready for shipment, four thousand pounds. It is twenty-eight inches in diameter at the base. The several hundred palms aligning the avenue on the grounds of the Panama-Pacific International Exposition in 1915 were supplied by us. Not a single one went back. They weighed from eight to thirty tons each. Some of the Phoenix canariensis were three feet in diameter and were forty years old.
